APPENDIX A - DEFINITIONS OF TERMS ................................................................. 24
1 – Overview of Campus Facilities Inventory Update

1.1 Purpose of Campus Facilities Inventory

- Official record of campus space, building names, and street addresses
- Asset tracking
- Used in all aspects of planning, analysis and reporting
- Data provides project justification for renovation and new construction (UCSC usage as compared to CPEC standards)
- Source of data for Indirect Cost Recovery (ICR) for research space and National Science Foundation (NSF)
- Basis of annual reporting to OP and to the State
- Basis of OMP allocation calculations per building

1.2 Campus Facilities Inventory Update Process

The official campus facilities inventory is updated annually as of the fall quarter third-week census day (Wednesday), and the updated files submitted to the UC Office of the President (UCOP) by established deadlines.

Ongoing Throughout the Year

Capital Planning and Space Management (CPSM) collects information on known changes and updates FacilitiesLink with the following information.

- Major and Minor Capital Improvement Projects (new construction and alterations)
- Project information from Physical Plant and Physical Planning and Construction
- Lease information and changes
- Building acquisition
- Temporary (and Permanent) Transfer of Space Agreements

Units collect information on known changes and update FacilitiesLink with the following information:

- Room name
- Room use
- Station count and type
- Department (as long as it is within the same division)
- Principal Investigator, and Occupants (requires special permission)
**Annually Each Fall/Winter (October through January)**

**October**
- CPSM sends out the call to Space Control Officers (SCO) to complete the Facilities Inventory Update for their division.
- Units update the facilities inventory with room information as of the fall quarter third-week census day.
- Units review current space transfer agreements and updates CPSM with details on renewal or expired agreements.

**November**
- CPSM reviews room changes in November and accepts or rejects the updated information.
- Discrepancies and/or issues will be researched as necessary and resolved by CPSM and the unit submitting the edit.
- Unit edit capability will be suspended between inventory update due date (right before Thanksgiving) and the formal acceptance of the updated inventory by UCOP (usually by year end).

**December/January**
- CPSM submits the building and room information to UCOP.
- UCOP reviews the information, and then, after any necessary changes, approves the official fall space inventory census.
- The official fall space inventory census is then added to UCSC’s Data Warehouse and unit edit capability is restored.
2 – Obtaining a FacilitiesLink Account

2.1 Part 1: On-Line Account Application

1. Go to https://ucsc.metabim.com/ which opens the FacilitiesLink login screen.
2. Click on the “Apply for Account” link in the upper left-hand corner of the screen.
3. Complete the requested information and click the Apply button.

2.2 Part 2: Account Request Form

Authorization to establish a new FacilitiesLink user account with “view only” or “space management” access requires a signature from the head of your department. If you are going to be authorized to assign occupants to rooms or will be assisting with the Indirect Cost Recovery Survey you will need the signature of your division’s Space Control Officer (SCO).

The UCSC FacilitiesLink Account Request form is located at http://cpsm.ucsc.edu/documents/forms/faclink_acct_request.pdf.
2.2.1 Types of Account Permissions

Most new accounts are set up with “view only” permissions unless a business case has been provided requesting additional privileges.

- **View Only** – allows you to browse the information in FacilitiesLink.
- **Space Management** – allows you to update room information.
- **Assign Occupant** – allows you to add occupants, and PIs to rooms.
- **Indirect Cost Recovery (ICR) Survey Module** – every 5 years we complete an Indirect Cost Recovery Survey and if the campus elects to use FacilitiesLink to manage the survey, you would need special permission to access survey forms and grants information.

When all documents are complete and submitted, you will be contacted by someone from CPSM to verify the information provided. If approved, your account will then be activated and you can login to FacilitiesLink using your username and password.

**NOTE:** Contractors and other off-campus persons will also be required to file an ITS Access to Information Statement and be sponsored by a department manager.

### 3 - Overview of FacilitiesLink

The FacilitiesLink system is available for collecting, editing, and disseminating information about buildings and rooms for purposes of managing campus space. It was developed with the intention of making vital planning information available to the campus community, organized in the modules you see on the home page. FacilitiesLink is an information conduit that passes high-value facilities-related information to those who need it. It does this by dynamically providing extensive indexing, searching, and cross-reference links to all data. Graphic images (campus maps, floor plans, project sheet sets) are viewable, reports are provided for the tabular data, and all information can be downloaded to the desktop.

### 3.1 Basic Navigation

FacilitiesLink is an intuitive, user-friendly tool that allows you to easily access detailed information from several different perspectives. You can move smoothly from one menu to another and one view to another. FacilitiesLink is a “smart” system and takes you back to where you were when you last visited a menu. Here are some tips to assist you in navigating FacilitiesLink most efficiently:

- As you move to deeper levels of a menu, you can go back using the navigation bar (“breadcrumb” trail) at the top left of the screen (or use your “back” button)
- All blue text is a link, either to another screen, reference or documentation. You can open the item in a new window by right click (PC) or Ctrl+click (Mac)

### 3.2 Locating Your Facilities Information

You will find that you can get to the same information in a variety of ways in FacilitiesLink. Your facilities inventory can be viewed organizationally by department or division, or geographically by building or neighborhood. You can also use fields in the Space Inventory module to select specified data. All are explained in later sections.
3.3 Downloading Data from FacilitiesLink

There may be times when you will want the “raw” data from FacilitiesLink in order to prepare your own reports, presentations, calculations, etc. FacilitiesLink makes downloading your data and floor plans very easy. The file formats available to you will change depending on the type of information you are downloading.

3.3.1 Downloading Report Data

- **Excel (.xlsx) and Comma Separated Variable (.csv)** will create files that can be used by most spreadsheet software applications (Excel, Numbers, and Google Sheets).
- **Tab (.tab)** files are text files that contain a list of data separated by tabs.
- **KML (.kml)** is a file format used to display geographic data in an Earth browser such as Google Earth and Google Maps.

3.3.2 Downloading Floor Plans

- **CAD Files (.dwg, .dwf, and .dfx)** are the native formats of several CAD packages (such as AutoCAD). You would need a CAD program to open these file types.
- **Portable Document Format PDF (.pdf)** is a file format used to present documents in a manner independent of application software, hardware or operating system.

3.4 Printing and Screenshots

Any screen you are viewing can be printed by clicking on the File menu in your browser and choosing print or by pressing Ctrl+P (PC) or Command+P (Mac). There is a link in the upper right hand corner of most screens that will toggle between a Print Version and a Web Version. The Print Version will remove the site header prior to printing. Click it again to return to the Web Version. Depending on what you are printing, you may want to change the orientation from portrait to landscape in the print settings.

Screenshots enable you to copy into another document exactly what appears on your FacilitiesLink screen. This is how the FacilitiesLink images were added to this manual. On a PC, press Alt+Print Screen then “paste” it into your document or use Microsoft Paint to edit the image. On a Mac, press Command+Shift+4, position your cursor in one corner of the screen you wish to capture and drag to define the entire area. Any portion of a screen view can also be copied using “Snipping Tool” and pasted into another document.

3.5 FacilitiesLink Home Page

The applications you see on the home page will vary based on your permissions. To return to the Home page at any time, click on the Home link in the navigation bar (Navbar). Applications are accessed from the home page by clicking on the link or the icon.
3.6 Space Information – by Building

From the FacilitiesLink home page, you can access building information for any building on campus through an alphabetical directory. From the Buildings Directory, you can also select the 4-digit building asset number (CAAN) and go directly to that building page.

NOTE: On the alphabetical listing, building names in italics are “nicknames” or common names by which those buildings are known on campus. These links will also take you to the correct building information page.

3.6.1 Building Information Page

The building information page includes building, construction and area information, a listing of occupying departments (by square footage area and room count), links to room-by-room space inventory by floor and to detailed reports such as square footage summary, OMP and room usage distribution. Many building pages have photos as well. If floor plans
are in the system, they will also appear on the building page with links to the drawings (see section 3.6.3).

Figure 5 - Building Page

3.6.2 Report Gallery

You will find a variety of predesigned reports to help you access the building data from different perspectives. Many reports have built in links that help you drill down from summary data into detailed data. For example, you could use the Room Use/Type report when you are assigning occupants to offices or labs. You should explore the different reports in the gallery to find those most useful to your work with FacilitiesLink data.

3.6.3 Floor Plans

If building floor plans are available, the building page shows the plans and provides links to each drawing. Simply click on the floor plan to open it. To zoom in on a section of a floor plan, click on the zoom magnification and then click and drag the section selector (red box) to move around the enlarged floor plan.

You can download the drawing in a variety of formats, including PDF. You will find the download options in the bottom right-hand corner, under the floor plan.

Figure 6 - Working with Floor Plans
Some of the newer floor plans have links to room information. The Click Rooms option is located in the upper left-hand corner of the screen and when enabled it will take you directly from the floor plan into the room record when you click on a specific room. This option is turned off by default so you need to turn it on to enable it.

The newer building floor plans also have “Themes” enabled. Use a theme to see a visual representation of the room data. If themes are available on the floor plan, you will see the Themes link below the floor plan. You can toggle this option on and off by clicking on it. If it is enabled it should be displayed with a yellow highlight. A legend appears below the floor plan. See example below of McHenry floor plan showing space by department.
3.6.4 Space Inventory

Detailed room information is accessed by clicking on the Space Inventory links found in several locations on the building page. You can look at individual inventories for each floor or access the complete report from the Space Inventory reports lower on the page. This leads to a tabulated report with room-by-room detail including room number, room name, area, room use code, stations, occupying department, and OMP. The room number is a live link that will take you to the room record where you can make changes if you have been given “space management” or “assign occupant” privileges.

Click on the column headings to sort the data by room number (the default), area (room size), by room use/type or by department.

If you have “assign occupant” privileges, you will find options under the “Select a Theme” window on the right hand side of the space inventory screen that allow you to see the occupants and PIs assigned to rooms.

Using the theme for Loan Agreements (available to all users) will allow you to see any space in the building or floor that is on loan from another division/department.

Figure 9 - Theme options available for seeing additional information in inventory list.

3.6.5 Filtering Data Using Search Fields

Most FacilitiesLink modules have filtering options at the top of the screen that help you search and retrieve specific information.

3.7 Space Information – by Divisions and Schools

Selecting the Division module from the home page leads to a summary report of all division-level groupings. The summary is a visual representation of the amount of space allocated to each division. If you prefer to see a tabular report, click on the Report tab.
You can drill down into specific data by division by clicking on the division name from either report view. Selecting a specific division or school from the list takes you to a division page. The division page provides total space information for that organization and links to its departments, buildings and rooms.

Division reporting includes the current space inventory and equipment inventory for the entire division.
Overview of FacilitiesLink

Figure 12 - Division Information

3.8 Space Information – by Departments

Selecting Departments from the home page takes you to an alphabetical directory of departments. If you prefer to access an organizational hierarchy listing, click on “Tree” view. You can return to the department list by using your “back” button or clicking on “Table” view. The department page shows the program name and associated codes, the total number of buildings and a list of buildings and rooms occupied, total square footage, OMP funding, as well as other CEFA required reporting elements.

Figure 13 - Department Information

As you scroll down the page you will see all of the buildings where that department occupies space. The building names are live links that will take you to the space inventory for that building, but only the space assigned to that department will be displayed.
Overview of FacilitiesLink

**Figure 14 - Building Locations and Floor Plans for all spaces assigned to the department you are viewing.**

**Figure 15 - Space Inventories by building**

Facilities reports available for the selected department include the current space inventory (with tabbed, downloadable room-by-room information, including floor, space name and number, usage, area, OMP), and a graphic representation of room use distribution (ASF).

There are a variety of standard reports in the Report Gallery on the department page, including loaned space, space by building, room use, P.I.’s, and occupancy. Some reports may not be available to you based on your permissions. As with most reports in FacilitiesLink, you will find download formats in the bottom right hand corner of the onscreen report.
3.9 Room Use Categories

Room use categories, also referred to as room use codes, describe the primary use of a room. The room use code is a key element in all the categorization, summaries, reporting, analysis and planning of facilities space. There are more than 100 different types of space in the UCSC database, and the complete list, and their definitions, are accessed by selecting Room Use/Type from the FacilitiesLink home page.

Selecting any specific room use code displays a page showing the number of rooms in that category, total and average square footages, area and number of rooms by building, and other related reporting elements. You will also find the UC Facilities Inventory Guide (FIG) definition for that code and a description of what it includes and excludes.

3.10 Floor Plan Gallery

You will find floor plans on building, division, and department pages or you can access them through the Floor Plan Gallery link located on the home page. The floor plans are displayed in alphabetical order by building name, but you can also use the search fields at the top of the screen to find specific floor plans. On the Report tab you will find a tabular report also listed in alphabetical order. Once you have selected a building, you can view and download any or all of the documents in the Floor Plan Flies.
3.11 Contacts

Updating the occupant(s) in a room and the Principal Investigator (PI) using the space for research requires access to the Contacts database (a listing of all active UC Santa Cruz employees) in FacilitiesLink. This is a restricted privilege and requires authorization and signature approval by the division’s Space Control Officer (SCO). If the division facilities coordinator does not have this access, contact FacilitiesLink Help for assistance. Detailed instructions on managing occupancy and adding contacts is provided in the training, and in Section 4.3 of this manual.

4 – Editing Data in FacilitiesLink

Only users with “space management” or “assign occupant” permissions can make room edits or add occupants and/or equipment to rooms in FacilitiesLink. Please DO NOT edit any room information for department or division space that is not allocated to the department or division for which you have editing responsibility.

4.1 Room Edits

When you navigate to a room screen you are in view mode by default. You can access an edit screen by clicking on the “Update Room” link located in the upper left corner of the screen. Your changes are not saved until you click on the Update button at the bottom of the Update Room edit screen.

Once you have updated a room, CPSM will be notified that a room change is “pending”. CPSM reviews all pending changes in FacilitiesLink and will either approve or reject them. If the change is rejected, the room information is reset back to the previous room data.

NOTE: If you go into the update page but make NO CHANGES to the room, please click on the Cancel button to exit the edit page. If you click Update button, CPSM will have to review that room record, even though nothing was actually changed.
4.2 Room Data You Can Edit in FacilitiesLink

The UCSC Facilities Inventory accounts for every room in every UCSC building both on and off campus. The room data is the basis of the information that is rolled up into the reports that demonstrate how space on campus is utilized. The information’s accuracy is totally dependent upon the data put into these room records. There are many fields on the Update Room page, but this will address only the fields that you might be updating to reflect changes to spaces allocated to the department/division you support.

4.2.1 Floor

Some UCSC buildings have non-standard room numbering, which proved problematic for FacilitiesLink. If you find a room listed on the wrong floor, please contact CPSM to make the correction.

4.2.2 Room Number

Room numbering changes should not be made without consultation with CPSM regarding campus room numbering protocols.

4.2.3 Comments

Use the comment field to enter any additional information about the room that your unit wants included. These comments will display toward the top of the room record page and be visible to all users.

4.2.4 Room Use/Type

It is very important to give the room the correct room use code. If you are unsure of which code to use, please refer to the Room Use Categories module accessed from the home page. Please note that only General Assignment Classrooms (department) can use the
“Classroom” room use codes 110-Classroom, 125-Classroom Service, and 130-Seminar Room. The 250-Scholarly Activity code can only be used by I&R departments.

4.2.5 Station Count
Enter the station count for all occupied spaces. Room use codes 110, 130, 260, 261, 270, 340 and 650 must have station counts listed or an error report is triggered in our submittal. Station counts for room use codes 210, 211, 250, 310, 320 and 470 are required for campus purposes.

4.2.6 Station Type
Choose the appropriate station type from the pick list. If you are not sure of the station type, select Unclassified. This information may be useful but is not critical to the inventory reports, and is therefore optional.

4.2.7 Department
Select the department that is occupying a room from the pick list. If a room is no longer allocated to a department you support, you may remove the occupant’s name but the department now occupying the room should make the other room edits, including the occupying department’s name.

NOTE: The Division Code and Program Code update automatically when a department is selected.

4.2.8 Loan From
If a room is being loaned pursuant to a Transfer of Space Agreement, the occupying department is listed in the Department field and the department loaning the space is selected from the pick list for the Loan From field. The Loan Notes field is for the Temporary (or Permanent) Transfer of Space Agreement number and the status of the loan. If a space transfer is in process, please state that in the Loan Notes field. It will be updated by CPSM when the Transfer of Space Agreement is completed and a number assigned.

4.2.9 Dividing a Room for Shared Space with Multiple Departments or Uses
There are many reasons to divide a room even when there is no physical partition. These include multiple departments sharing a room, multiple uses within a room (e.g. office and conference), and more than one Principal Investigator sharing a room with organized research or sponsored projects.

When you are in the “update room” view, you will see a “Divide” button to the right of the room data on the screen. When you click on the divide button, you will see a second set of fields and the space suffixes of Y & Z. If the room is divided more than 2 times the suffix will continue with X, W, etc. You are required to determine the % of space used by each department/room use/PI and the total should equal 100%. Complete the fields for each portion of the room, including station count as appropriate, and click the Update button when finished. Occupants and P.I.’s can then be added from the room page in the appropriate portion of the space.
Multiple Departments Sharing Space

If you have a shared room but the occupants are all from the same department, there is no need to divide the room. You can simply set the department and update the station count and occupancy. If the room is shared by occupants from two (or more) different departments, you should divide the space and assign a percentage to each department. If a portion of the space is being loaned to a different department, a space transfer agreement should be completed and the loan information reflected in the room record.

Multiple Room Use Categories

If a room has more than one function you should divide the room using the percentage of either space or time that is spent on each activity. For example, if you have a piece of equipment in a room that is shared by other people in the department in someone’s office, a portion of the space would be an Administrative Office (code 320) and the other portion would be Office Service (code 335).

Multiple Principal Investigators (PIs)

If you have a room with organized research or sponsored projects that is shared by more than one PI, you should divide the space and add the PI into the Principal Investigator field. This information is necessary for the campus’ Indirect Cost Recovery survey.

4.2.10 Non-Assignable Space (NSF)

Non-assignable square feet (NSF) is defined in the Facilities Inventory Guide (FIG) as all areas essential to general building operation but not able to be assigned to a specific department or activity. This includes public circulation, custodial services areas, mechanical areas, public restrooms, and adjacent parking. NSF spaces are included in the inventory reported to the state as they are totaled for each building, by category, and contribute to a determination of the building’s space “efficiency.”
On the UCSC campus, the non-assignable spaces are numbered with codes preceding the digits that indicate the type of space: NM for mechanical; NMxxxxT for mechanical ITS; NMxxxxL for mechanical electrical; NJ for janitorial/custodial; NC for public circulation and NT for public restrooms. As you review building records, please note the NSF space if it is included, and alert CPSM to any inaccuracies or corrections needed.

4.3 Room Data You Cannot Edit

4.3.1 Fields Edited Only by CPSM
Capital Planning and Space Management is the only unit authorized to edit Building Name, room Square Feet (assignable and non-assignable), and also has responsibility for room numbering protocols used throughout the campus. Do not revise room numbers without CPSM consultation. Creating and deleting room records are also done only by CPSM.

4.3.2 Fields Not Used by UCSC
The fields on the Update Room screen not currently used by UCSC are Suite, Ceiling (height), and Function.

4.4 Managing Occupants
If you have “assign occupant” permissions you will see a section called “Occupants” on the room record page. If there are occupants already assigned to the room they will be listed in the Occupants section of the room page.

4.4.1 Updating an Existing Occupant
Basic contact information for occupants is populated by the UCSC Staff Human Resources and Academic HR Payroll Personnel System (PPS). You can add additional information to a contact (i.e. phone number, email address, etc.) prior to adding them as an occupant in a room. Click on the Update button to save any changes you make to an existing occupant.

4.4.2 Adding an Occupant
When you click on the Add link to add an occupant to a room you will see a list containing all active staff in the department the room is assigned to. If you are adding an occupant from a different department, choose the department from the pick list in the Staff Directory field. The list is displayed in alphabetic order by last name, however you can also use the search fields to help locate the occupant.

Once you have located the occupant you wish to add, click on the Add link on the right hand side of the screen. You can manually enter the month, day and year for the Occupied field or click on the calendar icon and select the date from the calendar view. Click on the Create button to add the occupant to the room.

NOTE: If you do not see the name of the occupant you wish to add, clear the Department field by clicking on the blank space at the very top of the department listing. Type the last name of the contact you are trying to locate in the Name search field. If the occupant exists in the contacts database, you should see them listed in the search results.
4.4.3 Creating a New Contact
If you cannot find the occupant in the contact module, you can add a TEMPORARY contact in the Affiliates address book. Do not add a contact to a department list. Contacts in the department listing should come from the personnel database feeds.

Click the Create Contact link in the upper left-hand corner of the screen. Click on Address Book and select an affiliate address book. If you are unsure which one to use, choose University Affiliates. Continue filling out the required information and click the Create button.

4.4.4 Unoccupied, Vacant and Inactive Rooms
The campus has numerous space needs and an accurate inventory helps in identifying potential solutions. This information is essential for creating feasible space plans and for resolving new faculty recruitment and temporary overflow needs. It is therefore necessary to update occupancy in all rooms. If a room is vacant, please state that in the Room Name field and show the room use as 010-Inactive. If the department is reserving the room for an approved recruitment, please state that in the Room Name field.

4.4.5 Occupancy and Faculty/Principal Investigator
In addition to adding faculty names as room occupants, for any space that is controlled by a faculty member (whether or not occupied by that faculty member), please enter the faculty member’s name in the space for Principal Investigator.

4.5 Approval Process for Changes in FacilitiesLink
All changes made by users show up immediately online and affect campus planning and analysis derived from FacilitiesLink. The changes are also queued for review, validation and approval by CPSM personnel. The pending changes are reviewed throughout the year and during the Facilities Inventory Update each fall. Once these changes are quality checked and verified, the data is exported to the Data Warehouse and becomes part of the record which is sent to UC Office of the President. All new buildings, alterations, and department name changes handled by CPSM staff.
5 - Other Key Information

5.1 Private Activity

UC capital projects may be funded with external financing or with State bonds, which are typically issued as tax-exempt bonds. Therefore, projects financed with State bond funds or external financing are subject to federal tax limitations regarding "private use" occurring in the facilities. The definition of "private" activity is use of a tax-exempt financed facility by non-governmental people in a trade or business. Non-governmental use includes use by the federal government, 501(c)(3) organizations, private corporations, and individuals acting on their own. Use by agencies of the state, city, school district or local government is treated as governmental use and is not considered private activity.

Identify space that is being used or being considered for use by a private activity in the Comments section on the Room Update page. Examples of private activity are: the Porter Slug Café, MBEST tenants in the MBEST Center, and space leased to US Fish & Wildlife at the Coastal Science Campus. Use the department “Campus Commercial Enterprises” to track all private activity in rooms. Note the department loaning the space in the Loan From field.

5.2 Indirect Cost Recovery (ICR)

Every 5 years the campus will conduct a space survey to support the UCSC Federal indirect cost recovery rate proposal. As a starting point, the ICR survey will rely on information you provide in the fall inventory update. Therefore, please pay particular attention to correctly classifying room use and identifying occupants of certain rooms occupied by academic departments, organized research units, and organized activity.

The purpose of the ICR survey will be to collect occupancy and functional use data on a subset of rooms (those that support organized/sponsored research) throughout the base year. The data will be collected from the primary users of the space, the faculty themselves. However, for some rooms, you may be the best source of information. For these rooms, the staff from Planning and Budget will be contacting you directly.

5.3 Room Equipment and Features

Please take the time to update room features and equipment from the Equipment module for labs, such as installed research equipment, plumbing, gas connection, sink, fume hoods, air conditioning, or special lighting, in order to give as much information as possible about the unique features of the space. These updates will support a variety of space analyses and equipment lists and future Indirect Cost Recovery surveys.

6 - User Support

Please direct your general inquiries to FlinkHelp@ucsc.edu or contact Capital Planning & Space Management directly.

Diane Behling, (831) 459-3517, dbehling@ucsc.edu
Denise Blais (831) 502-7072, dblais@ucsc.edu
APPENDIX A - DEFINITIONS OF TERMS

ASF - Assignable Square Feet. Facility space assignable to people or programs, excluding non-assignable areas (mechanical and custodial services areas, public circulation, restrooms and private vehicle parking).

BGSF - Basic Gross Square Feet includes ASF, non-assignable areas, and structural elements (e.g., walls and support columns).

CAAN - Capital Asset Account Number. Although there are differences among the campuses, at UCSC they are always 4-digits and begin with 7. These numbers are assigned to all campus assets (including buildings, roads, infrastructure and other major improvements) by Capital Planning and Space Management.

Capacity Space - Refers to I&R projects or space that is covered by CPEC guidelines.

CEFA - Corporate Equipment and Facilities Assets. The UC system-wide reports our campus data feeds into.

Covered Unenclosed - Covered but not enclosed building areas (such as balconies and loading docks), not part of BGSF and excluding special areas such as swimming pools, stadia, or developed roof / deck areas.

CPEC - California Postsecondary Education Commission. The central (State) body responsible for coordination and planning for higher education. http://www.cpec.ca.gov/

CPSM – Capital Planning and Space Management, a department within Planning and Budget.

FIG - Facilities Inventory Guide is the UC system-wide reference guide for all facilities information.

I&R - Instruction and Research

ICR – Indirect Cost Recovery

MGSF – Maintained Gross Square Feet. Basic Gross Square Feet plus one-half (1/2) Covered Unenclosed, less Private Vehicle Parking Area.

NSF - National Science Foundation

NSF-Non- Assignable Square Feet. Facility space such as Circulation, Custodial, Public Rest rooms, Mechanical and Parking not assignable to a specific department.

OGSF - Outside Gross Square Feet (aka OGSF100). Basic Gross Square Feet plus Covered Unenclosed.

OGSF50 – California method of calculating Outside Gross Square Feet (aka Related Gross Area). Basic Gross Square Feet plus one-half (1/2) Covered Unenclosed.

OMP – Operation and Maintenance of Plant

OP - Office of the President for UC system (aka UCOP)

PPS – Payroll Personnel System
